

# MEET THE ANIMALS IN YOUR 2018 'RESCUED!' CALENDAR

Every animal we rescue, rehabilitate and re-home has a unique story about how they came into our care – whether they were abandoned, abused or neglected, all animals get a second chance at finding happiness with their forever family. Without support from our donors, sponsors and partners we can't continue this life changing work. Please donate today – give a voice to those who cannot speak for themselves.

## THE 2018 CALENDAR FEATURES ANIMALS ADOPTED FROM THE HBSPCA – READ THEIR STORIES HERE

Beans was a curious case from the minute he came into our care; at 3 days old, he was seized by our protection agents as part of a cruelty investigation and immediately brought to the Companion Animal Hospital in dire need of care. As per the medical notes in his file, Beans was missing part of his right front leg with the bones “protruding from raw, oozing stump. Also missing most of tail.” It’s thought that this trauma might have been inflicted by the mother cat, which can sometimes happen in very stressful situations either due to a difficult birth or hazardous living conditions (i.e. no food or water, no medical attention, no hygiene, etc) Beans needed constant care from a dedicated foster and for the first few weeks of his life, everywhere his foster mom went, Beans went. Bottle feedings and litter training were only one small part

of this tiny guy’s start in life; he needed a significant amount of recovery time for his wounds to heal and so he could adjust to having only three legs. He showed no signs of slowing down, and was always eager to meet new people and make his adventures. So when he was adopted by a long-time supporter with a large family of pets, everyone was so happy to know that Beans would have some pet companions. Now in his happy forever home, he rules the roost; even though he’s the youngest, he’s the boss – often chasing his cat and dog siblings to initiate playtime!
